Pixi™

CAT DRINKING FOUNTAIN

Cute design series by Catit

The Catit® PIXI™ range consists of high-end cat supplies with a sleek yet whimsical design, inspired by our adorable office cat Pixi. The special blend of catitude and skill results in unique, user-friendly products.

Cross-category range

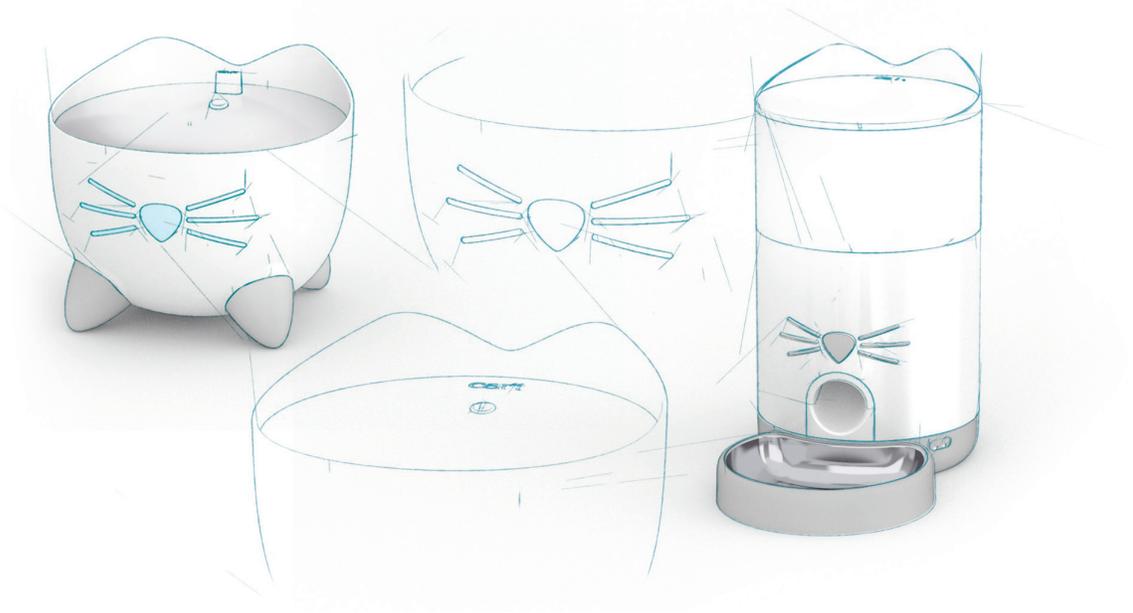

Comparable to our popular Catit® Senses® series, this new product line will continue to grow in the future, with products from various categories that all share their cat-like styling.

As with Catit® Senses®, these products are great as stand-alone items but also pair up beautifully thanks to their design.

Adorable styling

Our many conversations with cat groups have taught us that the 'cute' level in cat supplies is very important to cat parents. Catit® PIXI™ products all share cat-like traits, such as a nose with whiskers, ears, and/or tail in some cases. These adorable elements appeal to any audience that is either young at heart or cares for their cat(s) as parents do for their children.

Because of its sleek design, Catit® PIXI™ is reminiscent of a high-end fashion line that will tickle anyone's fancy.

PATENT PROTECTED.

Pixi™

CAT DRINKING FOUNTAIN

3-stage filtration with filter pad

The Catit® PIXI™ Fountain includes a filter that cleans your cat's drinking water in three stages.

- 1 Cotton mesh filters out debris
- 2 Active carbon removes odours and impurities
- 3 Ion exchange resin softens tap water*

*Reduces magnesium and calcium, which can lead to urinary tract diseases, a common health issue for cats. This product is not designed to cure any disease or illness.

For use with certified Catit® PIXI™ Fountain only.

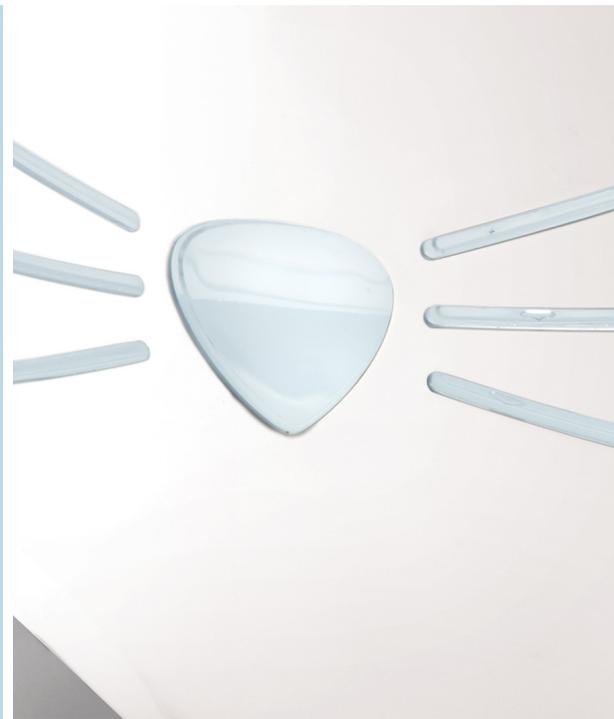

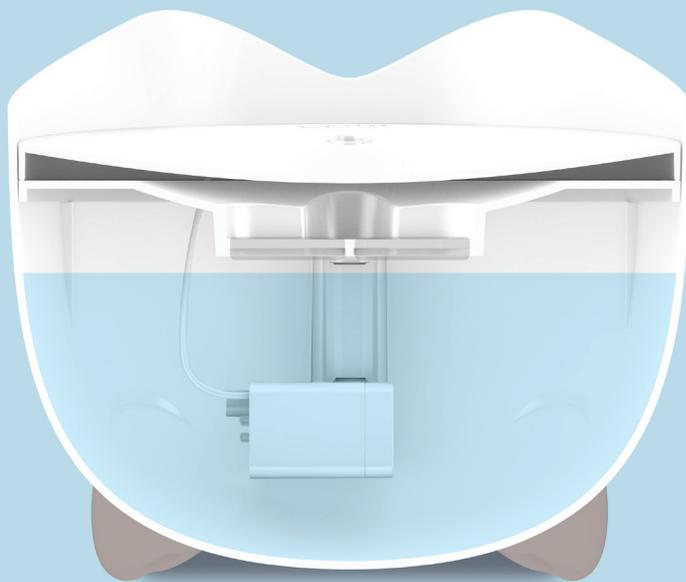

Replace the filter every 30 days for optimal results.

Pixi™

CAT DRINKING FOUNTAIN

Backlit water level window

With a water level window this adorable, you'll never lose sight of how much water is left. Fill the reservoir until the water level reaches the top of the whiskers, which marks the reservoir's maximum capacity.

Cute nightlight

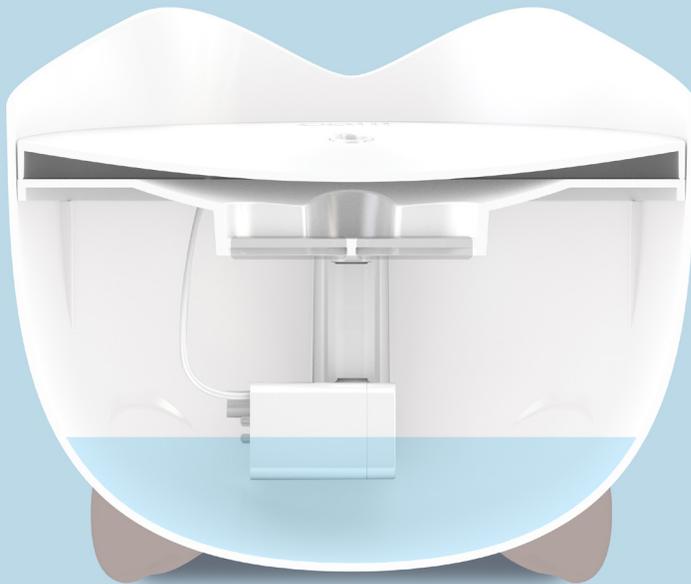

The nose lights up with a gentle glow to guide your cat to water in the darkness.

Pixi™

CAT DRINKING FOUNTAIN

Low water level alert with auto-shutdown

The pump is equipped with a sensor that detects when the water level is too low. At that point, the fountain will shut down automatically, to prevent the pump from running dry. Once the water reservoir is refilled, the fountain will start running again.

Time to refill

The nose flashes red when the water level inside of the reservoir is too low.

Pixi™

CAT DRINKING FOUNTAIN

Easy set-up

Check the instruction manual to get started with your Catit® PIXI™ Fountain!

Spout

Creates a water stream for your cats to drink from. This little add-on is easy to insert and remove.

Fountain top

The whisker stress-free, shallow bowl allows your cat to drink, even when the fountain is turned off. Catit® PIXI™ Fountain #43720 features a high-grade stainless steel top.

Filter pad

The filter purifies your cat's drinking water in 3 ways, and should be replaced every 30 days for optimal effects.

Filter tray

Keeps the filter pad securely in place. Soak the filter completely before inserting it with the packets facing down.

Pump

Since the pump is mounted in the water, it operates super-silently. It has a water level sensor and 2 LED light indicators.

Reservoir with water level window

Fill the reservoir until the water level reaches the top of the whiskers. This equals the max. capacity of 2.5 L / 84.5 fl oz.

Feet

The fountain is elevated by four adorable feet, which makes it very easy to pick up and refill.

Pixi™

CAT DRINKING FOUNTAIN

3 drinking options

The Catit® PIXI™ Fountain offers multiple drinking options to entice picky drinkers: calm flow, stream (with spout) and bubbling top. The featured drip collection zone helps stray drops of water to flow back into the reservoir.

Pixi™

CAT DRINKING FOUNTAIN

Whisker stress-free drinking surface with shallow bowl

Thanks to the bowl in front, your cat is able to drink at all times, even when the fountain is turned off. The fountain's drinking surface is wide and shallow, so that it doesn't place any stress on your cat's sensitive whiskers.

Stainless steel version

Catit® PIXI™ Fountain #43720 is equipped with a hygienic, high-grade stainless steel top that is dishwasher-safe.

Raised back

stimulates cats to drink at the front and helps prevent spills

Pixi™

CAT DRINKING FOUNTAIN

Super-silent

Since the fountain pump is mounted in the water, it doesn't vibrate as much against the reservoir and hardly makes any noise. The pump has a water level sensor and 2 LED lights (white when operational, and red when the water level is low).

Ceramic bearing

While wear and tear can cause pumps to grow noisier over time, ours has a durable ceramic bearing that will keep it running smoothly and silently for much longer.

Pixi™

CAT DRINKING FOUNTAIN

Ergonomic and user-friendly

Greatness is in the details: Since the Catit® PIXI™ Fountain sits slightly above ground, it's very easy to pick up for a quick refill.
